5,5 to 7,1 kW

MUNDOCLIMA[®]

9,0 to 16 kW

1. Air cooled system with no cooling tower which saves energy, space and provides a quieter operation.
2. Fan coils as indoor units use water instead of refrigerant. This water gets to the indoor units through an impulse pump.
3. Available units with DC Inverter Compressor (30% energy saving rate) or Digital Scroll (40% energy saving rate).
4. Plate heat exchanger.
5. Environmental friendly R410A Refrigerant.
6. Voltage protection, Current protection, Anti-freezing protection, Water flow protection ensure safe operation.
7. Rustproof system.
8. External coil protection grills.
9. Compact design: Built-in water pump and expansion tank. Only needs to be connected to the water pipe.
10. Emergency stop button.
11. Built-in water pressure gauge.
12. Flexible control: built-in inside control can be also remote controlled.
13. Built-in device for operation with low temperatures under -10°C.
14. Main functions:
 - a. Operation mode.
 - b. Error and status display indication.
 - c. Defrosting system.
 - d. Anti-freezing protection.
